

SUMMARY DEATHS AND CASES – STATISTICS MANIPULATED

- Death Toll from Covid19 has been manipulated and proper modelling has been ignored https://ipa.org.au/publications-ipa/media-releases/modelling-finds-covid-elimination-strategy-equal-to-entire-health-defence-education-and-welfare-spend-combined?fbclid=IwAR3SCmZ5BsXyk0RbMQiMIb9_n6WnXPKgvYk6ayQqH6mIKGmHWtnscr8oSsl

- Total worldwide deaths on average and for all countries have not increased since the declaration of covid19 pandemic! **EXHIBIT-DEATHS AND CASES DEBONO CHART**

“According to the mortality graphs, for Austria, Bulgaria, Croatia, Czech Republic, Denmark, Germany, Estonia, Finland, Greece, Hungary, Iceland, Israel, Latvia, Lithuania, Luxembourg, Norway, Poland, Portugal, Republic Korea, Slovakia, and Slovenia COVID-19 pandemic is

definitely not a “once in 100 years event” but more like a seasonal flu event.”- EXHIBIT-DEATHS AND CASES DATA SCIENTIST REPORT AND CHARTS

- Australian Head of Department of Health, **Brendan Murphy wrote to aged care providers requesting that any death in a resident who tested positive for Covid19 be immediately reported to state and Commonwealth authorities. “This request relates to all Covid19 related deaths, including those involving other causes or comorbidity factors”** he said. In other words it doesn't matter if they had a fatal condition of another kind that caused their death, while being tested positive for covid19 at the same time. Ref: The Age 4 September 2020.
- **According to the Australian Bureau of Statistics: 68,986 doctor certified deaths occurred between 1 January 2020 and 30 June 2020. Numbers of deaths have been below historical averages since mid May and below baseline minimums since the week ending 9 June.**

Deaths from respiratory diseases and heart diseases were below historical minimum counts throughout June. (no further figures available until next release on 28.10.20). <https://www.abs.gov.au/statistics/health/causes-death/provisional-mortality-statistics/latest-release>

- Glenferrie Private Hospital chief executive Julia Morgan wrote in an internal memo:

*“As you are aware, nine aged care patients were admitted to Glenferrie on 27 July. Sadly, four of these patients have since passed away. **We are unable to verify the exact cause of their death, but the State has officially attributed the deaths to COVID-19.**”* Source:

- Yet the government and health heads focus on the number of cases testing positive to rely on there being a crisis and spreading fear and panic.
- Nursing homes and hospitals get paid each time a covid19 case is declared and more money if covid19 death declared.
- The Bureau of Statistics does not require 100% proof or testing of covid19 deaths declared.

- The Australian Medical Association does not require 100% proof or testing of Covid19 deaths.
- No known autopsies of so called Covid19 deaths have been revealed publicly as of this date in Australia. The only autopsies i could find were ones done in Germany and Italy and they came up with blood coagulation - not a virus

Germany

<https://www.cidrap.umn.edu/news-perspective/2020/05/autopsies-covid-19-patients-reveal-clotting-concerns>

Italy (article with no references or citations - 50 autopsies in Bergamo)

<https://c-vine.com/blog/2020/05/16/italian-pathologists-hundreds-of-autopsies-show-covid-19-is-disseminated-pulmonary-thrombosis/>

- In Italy a change of medical treatment was immediately put into policy after autopsies revealed the true nature of the disease being different to what was otherwise assumed. Is it not in the interests of Australians to have independent autopsies and coronial inquires each time a covid19 death is declared?
- **The Australian Government’s own report shows that 91% of deaths had comorbidity so only 9% at most were caused solely by Covid19. EXHIBIT-DEATHS AND CASES – COVID 19 EPIDEMIOLOGY REPORT NO.22**
- **Comorbidity=**

It is important to understand that just because someone dies with coronavirus does not mean they died from coronavirus. For example, people who are already dying of serious conditions like chronic obstructive pulmonary disease or heart disease—who test positive for the SARS-CoV-2 virus—are now counted as Covid-19 deaths. The majority of people who allegedly have died from Covid19 have had these and other chronic health conditions, including diabetes, hypertension and lung disorders. In Italy, according to a study by the country’s national health authority, more than 99 percent of all coronavirus fatalities were in people who suffered from previous medical conditions.¹⁰ Another contextual factor that one must consider is that Italy administered a new form of influenza vaccine to elderly Italians for the 2018/2019 season that contained four different strains of influenza, including the highly pathogenic H1N1 “swine flu.”¹¹ According to the U.S. National Vaccine Injury Compensation Program, influenza vaccines cause more injuries and deaths than all other vaccines combined.¹² (Kendall L Nelson, vaccine consultant and journalist)
