

SUMMARY MASKS

- **Face Masks Pose Serious Risks to The Healthy - Dr. Russell Blaylock,**
<https://www.technocracy.news/blaylock-face-masks-pose-serious-risks-to-the-healthy/>

Dr. Russell Blaylock warns that not only do face masks fail to protect the healthy from getting sick, but they also create serious health risks to the wearer. The bottom line is that if you are not sick, you should not wear a face mask. "Until recently, the CDC did not recommend wearing a face mask or covering of any kind, unless a person was known to be infected, that is, until recently. Non-infected people need not wear a mask. When a person has TB we have them wear a mask, not the entire community of non-infected. The recommendations by the CDC and the WHO are not based on any studies of this virus and have never been used to contain any other virus pandemic or epidemic in history."

- **New WHO Guidelines (5 June 2020) for Face Masks Admit No Known Medical Benefits**
*Many countries have recommended the use of fabric masks/face coverings for the general public. At the present time, **the widespread use of masks by healthy people** in the community setting is **not yet supported by high quality or direct scientific evidence** and there are potential benefits and harms to consider. P6, P7 (psychological reasons for healthy people to wear a mask – no evidence only for the following)*
 - *reduced potential stigmatization of individuals wearing masks to prevent infecting others (source control) or of people caring for COVID-19 patients in non-clinical settings;*
 - *making people feel they can play a role in contributing to stopping spread of the virus;*

- **US OSHO Guidelines – 18 June 2020**
The US. Department of Labor Occupational and Safety and Health Administration's guidelines clearly show cloth and surgical masks don't work to reduce transmission of COVID-19, and how they deplete the body of oxygen causing adverse health effects.

- **COVID-19 Masks Are a Crime Against Humanity and Child Abuse** "Dr. Margarite Griesz-Brisson MD, PhD is a Consultant Neurologist and Neurophysiologist with a PhD in

Pharmacology, with special interest in neurotoxicology, environmental medicine, neuro regeneration and neuroplasticity. This is what she has to say about masks and their effects on our brains: *“The rebreathing of our exhaled air will without a doubt create oxygen deficiency and a flooding of carbon dioxide. We know that the human brain is very sensitive to oxygen deprivation. There are nerve cells for example in the hippocampus, that can’t be longer than 3 minutes without oxygen – they cannot survive. The acute warning symptoms are headaches, drowsiness, dizziness, issues in concentration, slowing down of the reaction time – reactions of the cognitive system.”* <https://www.globalresearch.ca/covid-19-masks-crime-against-humanity-child-abuse/5726059>
