

## DEFINITION OF “PANDEMIC”

According to the World Health Organisation (WHO):

“A pandemic is defined as “an epidemic occurring worldwide, or over a very wide area, crossing international boundaries and usually affecting a large number of people”. The classical definition includes nothing about population immunity, virology or disease severity.

By this definition, pandemics can be said to occur annually in each of the temperate southern and northern hemispheres, given that seasonal epidemics cross international boundaries and affect a large number of people. However, seasonal epidemics are not considered pandemics.”

<https://www.who.int/bulletin/volumes/89/7/11-088815/en/#:~:text=A%20pandemic%20is%20defined%20as,are%20not%20considered%20pandemics.>

The definition was changed by the WHO in 2020 and now appears to describe what is a regular seasonal epidemic of colds and flu. We do not believe this definition can legally or morally stand to influence health policy and modelling for nations around the world.

## FALSE PANDEMICS PREVIOUSLY DECLARED BY WHO

In the past the WHO has been found to have falsely declared a “pandemic” for example the Swine Flu. <https://www.abc.net.au/news/2010-06-11/34926>

Modelling has been based on the WHO’s shifting goal posts of what a “pandemic” really means.

The modelling used for international policy response is based on unpublished, unverified 13 year old code. (Some) *Australian modellers have appear to have deep financial ties to pharmaceutical companies and conflicted global power structures such as the Gates Foundation and Gavi (Vaccine Alliance).* **EXHIBIT- “HARRISON RESEARCH REPORT” page 5**

When the changing definition of “pandemic” is combined with false test results for Covid19 and manipulated death figures for Covid19, based on clear relevant and independent evidence, it appears that the case -made out in Australia that there is a Covid19 pandemic -has been built like skyscraper on moving sand.

EC Resolution 1749 (2010) on the lack of transparency and management of the H1N1 pandemic is just as relevant today as it was then in relation to non disclosure of financial and other interests. Nothing has been learnt in the intervening decade. *“5. Notwithstanding the willingness of WHO and the European health institutions concerned to enter into dialogue and conduct a review of the handling of the pandemic, the Assembly seriously regrets that they have not been willing to share some essential information, in particular to publish the names and declarations of interest of the members of the Emergency Committee of WHO and relevant European advisory bodies directly involved in recommendations concerning the handling of the pandemic. Furthermore, the Assembly regrets that WHO has not moved swiftly to revise or re-evaluate its position on the pandemic and the real health risks involved, despite the overwhelming evidence that the seriousness of the pandemic was vastly overestimated by WHO at the outset. In addition, the Assembly regrets the highly defensive stance taken by WHO, whether in terms of being unwilling to accept that a change in the definition of a pandemic was made, or an unwillingness to revise its prognosis on the pandemic.-* page 1

The WHO now confirms that Covid19 is no more dangerous than the common flu.

<https://www.who.int/news-room/events/detail/2020/10/05/default-calendar/executive-board-special-session-on-the-covid19-response>

During video "Session 1" around 1:01:33:

*"Our current best estimates tell us that about 10% % of the global population may have been infected by this virus [on par with seasonal flu]. This varies depending on country, it varies from urban to rural, it varies between different groups."*

The Head of Health Emergencies Program "best estimates" puts the Infection Fatality Ratio (IFR) at 0.14%! <https://off-guardian.org/2020/10/08/who-accidentally-confirms-covid-is-no-more-dangerous-than-flu> the estimate now of "0.14% is over 24 times LOWER than the WHO's "provisional figure" of 3.4% back in March. This figure was used in the models which were used to justify lockdowns and other draconian policies."

The Centre of Disease Control even admits there is no gold standard for isolating covid19  
<https://principia-scientific.com/even-cdc-now-admits-no-gold-standard-of-covid19-virus-isolate/>
